

Customer Sentiment Analysis Report

Generated on: April 10, 2025

Overall Customer Sentiment Summary

Mixed customer sentiment with a slight lean towards neutral to negative feedback. The NPS score distribution shows a relatively balanced spread across all ratings, with scores of 2 (49 responses) and 5 (44 responses) being the most common, followed by 1 (41 responses), 3 (39 responses), and 4 (32 responses). Positive feedback (NPS 1-2) often highlights excellent customer service, fast shipping, and competitive pricing, while negative feedback (NPS 4-5) frequently mentions unreliable products, poor customer service, and issues with business hours or stock availability. Neutral feedback (NPS 3) reflects average experiences with mixed comments on pricing and service. Overall, while there are significant strengths in customer service and delivery for some, persistent issues with product quality and operational policies are dragging down satisfaction for a considerable portion of customers.

Top 3 Reasons We Are Doing Great

- 1. Outstanding Customer Service:** Many customers with NPS scores of 1 and 2 praised the staff for being knowledgeable and going above and beyond to assist, especially in selecting the right products like hunting boots and fishing gear. Comments such as 'Outstanding customer service, staff went above and beyond to help me find the right gear' appear frequently in positive feedback.
- 2. Fast and Reliable Shipping:** Positive feedback often mentions fast shipping and on-time delivery of online orders, with customers expressing satisfaction in receiving products ahead of schedule. Phrases like 'Fast shipping on my online order, arrived ahead of schedule' are common among NPS 1 and 2 ratings.
- 3. Competitive Pricing and Product Quality:** Customers with high satisfaction (NPS 1-2) frequently noted the best prices for high-quality products, especially for fishing rods and camping gear, alongside comments like 'Best prices I've seen for high-quality fishing rods, no complaints here!' and appreciation for products working perfectly.

Top 3 Items Needing Improvement

- 1. Unreliable Product Quality:** A significant number of customers with NPS scores of 4 and 5 reported defective or unreliable products, with frequent mentions of items like bike tires popping on the first ride or fishing reels breaking after minimal use. Comments such as 'Unreliable product—my reel broke after one fishing trip' and 'Product was defective—my bike tire popped on the first ride' are prevalent in negative feedback.
- 2. Poor Customer Service and Return Policy:** Negative feedback often highlights terrible customer service experiences, with staff being unhelpful, slow, or ignoring customers, as well as frustration with a restrictive or nightmarish return policy. Statements like 'Terrible customer service, staff ignored me while I waited for help' and 'Return policy is a nightmare, they wouldn't take back a faulty item' are common.

among NPS 5 responses.

3. Inconvenient Business Hours and Stock Issues: Many customers with low satisfaction (NPS 4-5) complained about ridiculous or inconvenient business hours, often finding stores closed during needed times, alongside frequent out-of-stock issues leading to wasted trips. Feedback includes 'Business hours are ridiculous, closed mid-day when I stopped by' and 'Out of stock on half the fishing gear I needed, waste of a trip' as recurring themes.
